EYAL TAIEB.

BUSINESS CONTEXT. TECHNICAL EXECUTION.

AI DEPLOYMENT & GTM BUILDER

I build and deploy AI systems that turn business workflows into revenue.

From outbound platforms and voice agents to calling systems and CRM workflows, I connect business problems with software people actually use and real commercial outcomes.

SELECTED WORK / BUILT & DEPLOYED

Working systems, not prototypes.

Adaptable to existing workflows, data and infrastructure.

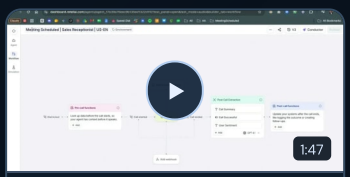

MeetingScheduled

AI Outbound Operating System

Company research, decision-makers, signals and personalized outreach in one complete outbound cadence.

Watch full demo ↗

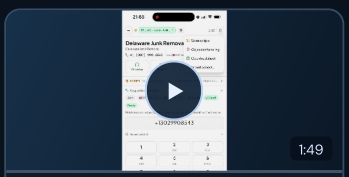

AI Voice Agent

Inbound & Outbound Calling

Answers calls, qualifies leads and books meetings. Automatically follows up with new website leads.

Watch full demo ↗

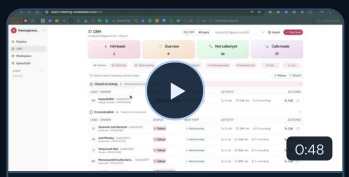

Speed Dialer

Multi-Line Outbound Calling

Multiple numbers, lead queues, call-status tracking and a clear next action after every call.

CRM & Revenue Systems

From Workflow to Revenue

Prospecting, calling, follow-up and pipeline reporting, brought together in a working CRM.

A bridge between business and technology.

Years of B2B pipeline building and technical sales shaped how I build AI systems today: understand the business problem, implement the workflow, and make it useful in the real world.
